

Abstract

The purposes of this research were as follows : to identify and compare the needs and problems of the graduates of Mahidol University, participation in graduates student activities, academics, sport, art and culture, morality, management, community services, recreational and career development and to list recommendations involving such needs and problems.

A sample of 365 graduates students was sampled using a stratified random sampling technique from the population of 4145 students. A 42 item questionnaire was used as the tool. Percentage, mean, standard deviation, t-test and one-way analysis of variance were used for data analysis.

The graduates students' need for participation in the above-mentioned activities was academic the next was community services and morality. The problem of participation in the above-mentioned activities was academic and the next career development and morality.

The graduate students in different academic departments did not differ in their needs for participation in activities at the statistical level of 0.05.

The graduate students in different academic departments did not differ in their problems for participation in activities at the statistical level of 0.05.
